

## Mission to Gujarat: steam systems

3–5 February 2020 | Dahej, Songadh, Surat, Vapi (Gujarat)

Between 3–5 February 2020, IGES–TERI along with a team from TLV, Japan conducted feasibility studies on steam systems in the following industrial units in Gujarat.

- J K Paper Limited, Songadh
- Anubha Industries Pvt. Ltd., Surat
- Aryan Paper Mills Pvt. Ltd., Vapi
- Gujarat Fluorochemicals Limited, Dahej

The TLV team conducted a survey of selected condensate discharge locations in the plants, using a portable steam trap checker called TrapMan®. The survey revealed a high potential for energy savings through replacement of faulty steam traps in the plant. The TLV team also advised the plants on other aspects related to steam system optimization. The advantages of using free float type steam traps were discussed with the plants.
