

Mission to Maharashtra—compressed air systems

21–25 January 2020 | Khopoli, Satara, Pune (Maharashtra)

Between 21–25 January 2020, IGES–TERI conducted feasibility studies on compressed air systems in the following three industrial units in Maharashtra.

- Huhtamaki PPL Ltd., Khopoli
- Paranjape Autocast Pvt. Ltd., Satara
- Tata Autocomp Systems Pvt. Ltd., Pune

The energy saving opportunities identified in the industries included air flow metering for individual compressors, proper piping system, installation of VFDs, installation of booster compressors for stand-alone high pressure applications, improved ventilation of the compressor room, use of efficient air guns, and adequate treatment of drainage before disposal.
